

THE LAND DOWNUNDER

by Ted Egan

Published by Evergreen Media 2003

The dedication "To all people, the Faces of Australia who inspired the songs, for they created the history " sums up the motivation for this book. It provides a background to the author's emotive stirring songs. The book include 28 songs, 24 chapters, glossary of Terms and Recommended Reading List. Australia's history in 228 pages

It is a book of personal recollections and interpretation of events and people in the history of our wonderful country. In parts, it is a little short on details and proof, offering opinions and folk law, without references and sources. It actually inspires the reader to find out more, from the books in the recommended reading list. An interesting book.
